Compact Laser Photoelectric Sensor with Built-in Amplifier

E3Z-LT/LR/LL

Compact and Reliable Laser Photoelectric Sensor

- Safety and reliability with laser class 1 (JIS and IEC).
- Product lineup includes models with distance setting without influence of color.
- Maximum ambient operating temperature of 55°C and waterproof construction in E3Z class.

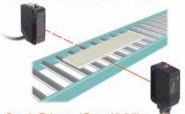

For the most recent information on models that have been certified for safety standards, refer to your OMRON website.

Applications

Detect the sides of large tiles.

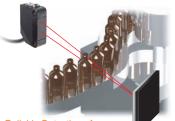

Greatly Enhanced Beam Visibility for Easier Optical Axis Adjustment of Sensors

Detect chip components on tape.

Count bottles.

Reliable Detection of Small Objects and Narrow Gaps with the Small Spot

Detect protruding straws.

A Low Black/White Error for Applications with Mixed Colors

Red light

Ordering Information

Sensors (Refer to Dimensions on page 11.)

| Sensing method | Annoaranaa | Connection | Response | Sensing distance | Мо | del |
|-----------------------|------------|---------------------------|----------|---|--|--|

| MSR function | *1 | Connector (M8, 4 pins) | | (Using E39-R12) (Using E39-R6) (Using E39-R6) | E3Z-LR66 | E3Z-LR86 |
| | | Pre-wired (2 m) | | 20 to 40 mm (Min. distance set) | E3Z-LL61 2M | E3Z-LL81 2M |
| Distance-settable | | Connector (M8, 4 pins) | | 20 to 300 mm (Max. distance set) | E3Z-LL66 | E3Z-LL86 |
| (BGS Models) | \searrow | Pre-wired (2 m) | 0.5 ms | 25 to 40 mm (Min. distance set) | E3Z-LL63 2M | E3Z-LL83 2M |
| | | Connector (M8, 4 pins) | 0.0 113 | 25 to 300 mm (Max. distance set) | E3Z-LL68 | E3Z-LL88 |

*1. The Reflector is sold separately. Select the Reflector model most suited to the application.
 *2. Values in parentheses indicate the minimum required distance between the Sensor and Reflector.

Accessories

Slits (A Slit is not provided with a Through-beam Sensor. Order a Slit separately if required.) (Refer to Dimensions on page 14.)

| Slit width | Sensing distance | Minimum detectable object (reference value) | Model | Contents |
|-------------|------------------|--|----------|--|
| 0.5 mm dia. | 3 m | 0.1 mm dia. | E39-S65A | One set (contains Slits for both the Emitter and Receiver) |

Reflectors (A Reflector is required for each Retro-reflective Sensor: A Reflector is not provided with the Sensor. Be sure to order a Reflector.) (Refer to Dimensions on page 14.)

| Name | Sensing | distance | Model | Remarks | |
|-----------|--------------|-----------------|---------|--|--|
| Name | Rated value | Reference value | Model | Remarks | |
| | | 15 m (300 mm) | E39-R1 | Retro-reflective models are not provided with Reflectors. | |
| Reflector | 7 m (200 mm) | | E39-R12 | Separate the Sensor and the Reflector by at least the distance given in parentheses. | |
| | | 7 m (200 mm) | E39-R6 | • The MSR function is enabled. | |

Note: If you use the Reflector at any distance other than the rated distance, make sure that the stability indicator lights properly when you install the Sensor.

Mounting Brackets A Mounting Bracket is not provided with the Sensor. Order a Mounting Bracket separately if required. (Refer to Dimensions on E39-L/E39-S/E39-R.)

| Appear- ance | Model | Quantity | Remarks | Appear- ance | Model | Quantity | Remarks |
|-----------------|-----------------------|----------|--|-----------------|-----------------------|----------|--|
| | E39-L153 *1 | 1 | Mounting Brackets | | E39-L98 *2 | 1 | Metal Protective Cover Bracket |
| a state | E39-L104 *1 | 1 | | | E39-L150 | 1 set | (Sensor adjuster) |
| 6 | E39-L43 *2 | 1 | Horizontal Mounting Bracket | | E39-L151 | 1 set | Easily mounted to the aluminum frame rails of conveyors and easily adjusted. For left to right adjustment |
| | E39-L142 *2 | 1 | Horizontal Protective Cover Bracket | | | | |
| | E39-L44 | 1 | Rear Mounting Bracket | | E39-L144 *2 | 1 | Compact Protective Cover Bracket (For E3Z only) |

Note: When using a Through-beam Sensor, order one Mounting Bracket for the Receiver and one for the Emitter *1. Cannot be used for Standard Connector models with mounting surface on the bottom. In that case, use Pre-wired Connector models. *2. Cannot be used for Standard Connector models.

Sensor I/O Connectors (Sockets on One Cable End)

(Models for Connectors and Pre-wired Connectors: A Connector is not provided with the Sensor. Be sure to order a Connector separately.) (Refer to Dimensions on XS3)

| Size | Cable | Appear | rance | Cable t | ype | Model |
|------|----------|----------------|--------|---------|---------------|-----------------|
| | | Straight *1 | 4 (10) | 2 m | | XS3F-M421-402-A |
| M8 | Standard | Straight | | | 5 m 4-wire | XS3F-M421-405-A |
| IVIO | Stanuaru | L-shaped *1 *2 | | | 4-wire | XS3F-M422-402-A |
| | | L-shaped i Z | | 5 m | | XS3F-M422-405-A |

Note: When using a Through-beam Sensor, order one Mounting Bracket for the Receiver and one for the Emitter

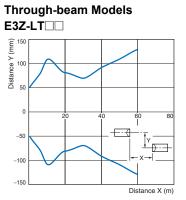

*1. The connector will not rotate after connecting.
*2. The cable is fixed at an angle of 180° from the sensor emitter/receiver surface.

* Models numbers for Through-beam Sensors (E3Z-LT□□) are for sets that include both the Emitter and Receiver. The model number of the Emitter is expressed by adding "-L" to the set model number (example: E3Z-LT61-L 2M), the model number of the Receiver, by adding "-D" (example: E3Z-LT61-D 2M.) Refer to Ordering Information to confirm model numbers for Emitter and Receivers.

Safety Precautions

Refer to Warranty and Limitations of Liability.

<u> WARNING</u>

This product is not designed or rated for ensuring safety of persons. Do not use it for such purpose.

 \bigcirc

To ensure safe use of laser products, do not allow the laser beam to enter your eye. Direct exposure may adversely affect your eyesight.

CAUTION

Do not connect an AC power supply to the Sensor. If AC power (100 VAC or more) is supplied to the Sensor, it may explode or burn.

Precautions for Safe Use

Be sure to abide by the following precautions for the safe operation of the Sensor.

Operating Environment

Do not use the Sensor in locations with explosive or flammable gas.

Wiring

Power Supply Voltage and Output Load Power Supply Voltage

Make sure that the power supply to the Sensor is within the rated voltage range. If a voltage exceeding the rated voltage range is supplied to the Sensor, it may explode or burn.

Power Supply Voltage

The maximum power supply voltage is 26.4 VDC. Applying a voltage exceeding the rated range may damage the Sensor or cause burning.

Load

Do not use a load that exceeds the rated load.

Load Short-circuiting

Do not short-circuit the load, otherwise the Sensor may be damaged or it may burn.

Connection without Load

Do not connect the power supply to the Sensor with no load connected, otherwise the internal elements may explode or burn. Always connect a load when wiring.

Precautions for Correct Use

Do not use the product in atmospheres or environments that exceed product ratings.

Laser Warning Labels

Be sure that the correct laser warning label (enclosed) is attached for the country of intended use of the equipment containing the Photoelectric Sensor. Refer to the user's manual for details.

Usage Environment

Water Resistance

The Sensor is rated IP67. Do not use it in water, in the rain, or outdoors.

Ambient Environment

Do not install the product in the following locations. Doing so may result in product failure or malfunction.

- Locations subject to excess dust and dirt
- Locations subject to direct sunlight
- Locations subject to corrosive gas
- Locations subject to organic solvents
- Locations subject to shock or vibration
 Locations subject to exposure to water, oil, or chemicals
- Locations subject to exposure to water, oil, or chemical
 Locations subject to high humidity or condensation
- Locations subject to high humidity of condensati

Designing

Power Reset Time

The Sensor is ready to operate 100 ms after the Sensor is turned ON. If the load and Sensor are connected to independent power supplies respectively, be sure to turn ON the Sensor before supplying power to the load.

• Wiring

Avoiding Malfunctions

If using the Sensor with an inverter or servomotor, always ground the FG (frame ground) and G (ground) terminals, otherwise the Sensor may malfunction.

Mounting

Mounting the Sensor

- If Sensors are mounted face-to-face, make sure that the optical axes are not in opposition to each other. Otherwise, mutual interference may result.
- Always install the Sensor carefully so that the aperture angle range of the Sensor will not cause it to be directly exposed to intensive light, such as sunlight, fluorescent light, or incandescent light.
- Do not strike the Photoelectric Sensor with a hammer or any other tool during the installation of the Sensor, or the Sensor will lose its water-resistive properties.
- Use M3 screws to mount the Sensor.
- When mounting the case, make sure that the tightening torque applied to each screw does not exceed 0.54 $N{\cdot}m.$

Metal Connectors

- Always turn OFF the power supply to the Sensor before connecting or disconnecting the metal connector.
- Hold the connector cover to connect or disconnect it.
- If the XS3F is used, always tighten the connector cover by hand. Do not use pliers.

If the tightening is insufficient, the degree of protection will not be maintained and the Sensor may become loose due to vibration. The appropriate tightening torque is 0.3 to 0.4 N·m.

If other commercially available connectors are used, follow the recommended connector application conditions and recommended tightening torque specifications.

Mounting Direction for Distance-settable Models

 Make sure that the sensing side of the Sensor is parallel with the surface of the sensing objects.
 Normally, do not incline the Sensor towards the sensing object.

If the sensing object has a glossy surface, however, incline the Sensor

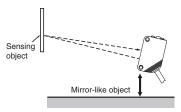

illustration, provided that the Sensor is not influenced by background

by 5° to 10° as shown in the

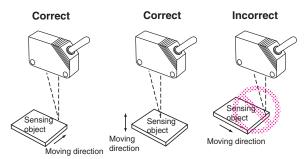

objects.

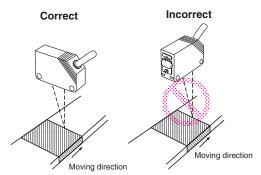

• If there is a mirror-like object below the Sensor, the Sensor may not operate stably. Therefore, incline the Sensor or separate the Sensor from the mirror-like object as shown below.

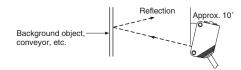

• Do not install the Sensor in the wrong direction. Refer to the following illustration.

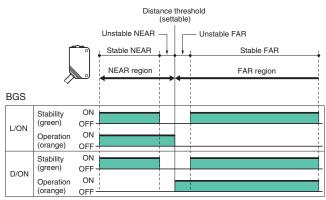

Install the Sensor as shown in the following illustration if each sensing object greatly differs in color or material.

• The stability indicator may turn off in reaction to reflection from background objects. In such cases, incline the Sensor by 10° as shown in the illustration for more stable detection.

Adjusting Distance-settable Models Indicator Operation

Note: If the stability indicator is lit, the detection/no detection status is stable within the rated ambient operating temperature (-10 to 55° C).

• Inspection and Maintenance

Cleaning

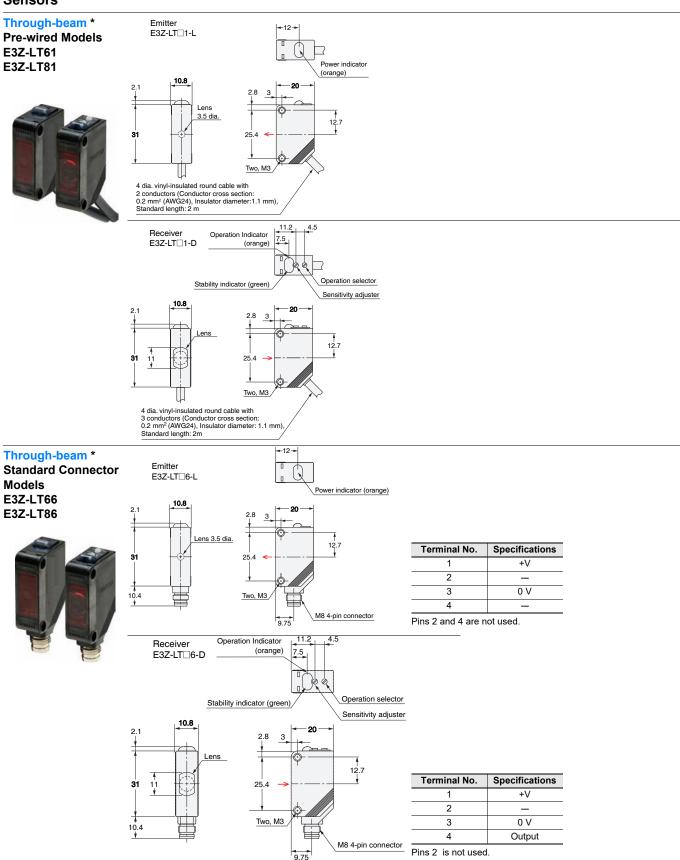

Never use paint thinners or other organic solvents to clean the surface of the product.

Dimensions

E3Z-LT/LR/LL

(Unit: mm) Tolerance class IT16 applies to dimensions in this datasheet unless otherwise specified.

Sensors

* Models numbers for Through-beam Sensors (E3Z-LT□□) are for sets that include both the Emitter and Receiver. The model number of the Emitter is expressed by adding "-L" to the set model number (example: E3Z-LT61-L 2M), the model number of the Receiver, by adding "-D" (example: E3Z-LT61-D 2M.) Refer to Ordering Information to confirm model numbers for Emitter and Receivers.
